Mastering the Science, Practicing the Art

Extruded Crisps

PGP International is an extrusion specialist and offers an assortment of extruded crisp products used as ingredients in the bars, snacks, breakfast foods, and confectionery industries to add nutritional value and texture.

Rooted in the heart of the rice growing region of California and with manufacturing capabilities in the midwestern United States, we are a leading manufacturer and supplier of protein crisps and grain crisps. Our versatile crisps are produced with a range of ingredients and in a variety of shapes and sizes.

Soy Protein Crisps

Our soy protein crisps can provide great texture and protein fortification for bars, granola, protein snacks, confection, and cereals. Available with protein levels of 28-90%.

Pea Protein Crisps

Our pea protein crisps are hexane-free and can be used in the production of bars, cereals, confections, and energy and nutrition foods. Available with protein levels of 35-60%.

Rice Protein Crisps

Our rice protein crisps are ideal for use in bars, cereals, energy and nutrition foods, granola,

snacks, yoghurt and dairy toppings. They are vegetarian, gluten-free, hypoallergenic, and easy to digest, so they are the perfect alternative for gluten sensitive consumers or people on restricted diets. Available with protein levels up to 60%.

Grain & Pulse Crisps

We produce a variety of grain and pulse crisps including ingredients such as rice, corn, quinoa, sorghum, and chickpeas. Ancient grains and pulses are becoming increasingly popular and are well-known for their health and nutritional benefits. Our crisps can be used in the production of both sweet and savory snacks.

Gluten-Free Breadcrumbs

Our GFCO certified gluten-free food coatings and crumbs have the same attributes typically found in gluten-containing breadcrumbs. Breadcrumbs can be made from rice, other gluten-free grains, or whole grains.

They are ideal for use as a breading for poultry and seafood, or as a textural component in meatballs, pizza doughs, stuffing, sauces, and baked items.

Rice & Rice Flour

Rice Flours & Meals

PGP International has been in the rice flour business since 1984. We pride ourselves in our high-quality rice flour products. Our medium grain rice flours are made exclusively from California medium grain rice. While our glutinous short grain sweet rice flour is produced from a special variety of the Cal Mochi 101 certified glutinous rice seed. We also offer organic long grain flour sourced domestically. Our products are available in a range of particle sizes from very fine to very coarse.

Rice Flour Premixes

We blend high quality Mochi or Uruchi rice flour with sugar or modified starch to make our premixes. Our rice flours are made with medium grain and glutinous rice varieties. Premixes can be used in a range of traditional Japanese applications, such as Wagashi, Senbei, Arare, Kashiwa Mochi, and Kiri Mochi.

Pre-Gelatinized Rice Flour

We have developed a variety of pre-gelatinized rice flours for the food and nutraceutical industry under the PAC® brand which have no chemical modification and offer a simple label declaration. Ingredients within PAC® can provide unique functionality as viscosity enhancers, fat mimetics, sugar reducers, freeze-thaw stabilizers, and humectants. These ingredients have a broad range of preparation capabilities in bars, granolas, beverages, bakery, and nutritional supplements.

PGP International provides the highest quality food ingredients to help you manufacture great tasting nutritional food products. PGPI's commitment to quality and food safety is recognized in the food industry. We have Global Food Safety Certification through BRC (AA Rated). Our foods are Non-GMO Project Verified, Gluten-Free, and QAI certified Organic. Additionally, we are registered with Sedex and certified to SGS' Non-GMO IP Supply Chain Standards.
